Pricing challenges

KEYNOTES

- For non-life insurance companies, the intensity of competition is increasing:
Companies need a tool to obtain the right tariff and to overcome the challenge.
- With ADDACTIS® Pricing, actuaries have the entire calculation process embedded in one powerful and user-friendly application.
- Data preparation and pre-analysis of data are key parts of the pricing process.
- GLM is the current market standard for pricing. ADDACTIS® Pricing embeds a powerful GLM engine which is able to handle large amount of data while ensuring high performance.
- In the Consolidation part, users can manage and combine all the models with adjustment values to build several premiums.
- With reporting part, ADDACTIS® Pricing offers several tools to apply and compare premiums.
- Thanks to a funny exercise, candidates could use the software and met pricing decision.
